Goals & Objectives

- Learn about compliance with state practice and infectious disease in particular.
- Learn mass theory and its application to biomechanics.
- Understand more clearly the role of biofilm in delayed wound healing.
- Learn concepts in surgical correction of hallux rigidus and plantar fasciitis.
- Understanding new concepts in pain management.
- Learn about skin markers as an indicator of system illness and apply dermatopathology concepts via case study method.
- Learn about the latest Medicare guidelines for evaluation and management coding with special attention to the very recent changes.

The ACPME has received an unrestricted educational grant from McClain Labs and Sole Supports to support this session.
